Industrial and Consumer Plastics

All parts come together, easy as 1,2,3!

1. EasyDRAIN™ Channel and Grate

2. EasyDRAIN™ Rainwater Pit

3. EasyDRAIN™ Flow-Way Gullytop

With the single-action Lockitin™ connector that clips together and stays together.

- New end caps connect directly to 110mm piping
- The 100mm x 100mm x 1 metre channel is super-light (2.8kg) and easy to handle*
- Featuring Lockitin™ connectors, EasyDRAIN™ takes seconds to put together meaning that you'll NEVER have to struggle with prejoined 3-metre lengths again
- Side struts anchor the channel in a slurry-filled trench, preventing it from floating
- Made from tough, recycled, UV stabilised polymer
- 200mm paver-length segments are moulded into the channel for easy cutting and rejoining using the Lockitin™ connectors
- Converter available to connect male to male sections
- Rated to 1.5 tonne wheel loads

Black Polymer

Terracotta Polymer

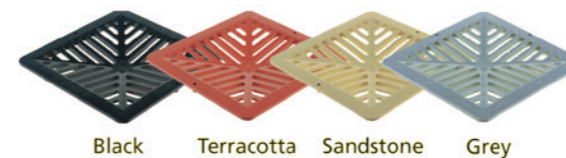

Sandstone Polymer

* Channel available in black, sandstone and terracotta

- Designed as a drainage collection point by itself or connected to EasyDRAIN™ Channel and Grate System
- Made from tough, recycled polymer
- Easy to install
- Coloured grates available in terracotta, black, sandstone and grey polymer
- Suitable for use in domestic and non trafficable applications

Black Terracotta Sandstone Grey

- A simple square trap design funnels rainwater direct into a connected stormwater pipe
- For total efficiency, Flo-Way Gullytop can connect to a 90mm or 110mm stormwater pipe
- Coloured grates available in terracotta, black, sandstone and grey polymer
